MohammedNader AlGhussin

Front-end React/Next Js Developer

LinkedIn • GitHub

mohammednaderalghussin@gmail.com
+201015244128
Egypt

Frontend Developer specializing in high-performance web applications using React, Next.js, TypeScript, Redux Toolkit, and Tailwind CSS. Built real-world projects including an e-commerce app, social platform, dashboards, and real-time chat application. Strong frontend focus with solid backend fundamentals in Node.js, Express.js, REST APIs, Web security, and databases, with an emphasis on clean architecture and performance.

Experience

front-end react JS developer at Avatar, Gaza - Palestine

June 2023 - July 2024 • ↗

- Managed the end-to-end front-end life cycle, handling REST API integration, state management, secure data flows, and owning all user-facing features and documentation.
- Developed and maintained responsive web applications using React, TypeScript, and Tailwind CSS.
- Enhanced legacy vanilla JavaScript code-bases for better performance, maintainability, and readability.
- Used Git/GitHub for version control, code reviews, and collaborative development.

Skills

Programming & Frontend Technologies: JavaScript, TypeScript, Bash Scripting, Redux, React, Next.js, Tan Stack Query, Tailwind CSS, Bootstrap, Sass, Shadcn UI, MUI, Fully Responsive Design

Backend Knowledge: Node.js, Express.js, MongoDB, PostgreSQL, Prisma ORM, Server Actions, Authentication, Authorization, Token Handling, Web Security Basics, REST API integration, Pagination handling

Tools & Development Practices: Git, GitHub, Linux OS, Figma, Adobe XD, Postman, Lovable AI, Vercel, Netlify, Railway

Projects

July 2024 - Present

E-Commerce Web Application — Full-Stack Project • ↗

Built a production-ready e-commerce platform with authentication, payments, and admin dashboard.

- Developed user-facing storefront with product listings, filtering, and responsive UI
- Implemented authentication using NextAuth (credentials, JWT + cookies) & form validation using RHF + Zod
- Integrated Stripe and PayPal for secure payment processing
- Designed relational DB schema using PostgreSQL + Prisma ORM
- Built Admin Dashboard with product CRUD, order management, and analytics

Social Media Application • ↗

A Social Media platform with secure authentication, and real-time state management using Redux Toolkit.

- Built a social media platform using React + TypeScript with a scalable and clean folder structure.
- Implemented authentication, protected routes, token persistence, and role-based UI behavior.
- Integrated REST APIs using Axios with Redux Toolkit (slices, async thunks, typed state).
- Developed posts, comments, pagination, image upload, and user profile features.

Sprachly | AI-Assisted — Full-Stack Project • ↗

A real-time communication platform featuring persistent messaging and live presence tracking.

- Leveraged AI agents to architect and deploy a React/TypeScript application from concept to live domain.
- Integrated Ably WebSockets for sub-millisecond message delivery, live typing indicators and status.
- Engineered a robust Supabase infrastructure with Row-Level Security and authenticated data streams for private messaging.

Education

Computer System Engineering at Al-Azhar university , Gaza - Palestine

September 2019 - November 2024

Strong foundation in programming, algorithms, databases, system design, and web development with hands-on experience through academic projects and practical coursework. Graduated with (84.45) GPA
